Mandatory Language for Monitoring and Reporting Violation

Chemical Sampling

CHEMICAL MONITORING, ROUTINE MAJOR

City of Rhome PWS ID 2490007 has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Public water systems are required to collect and submit chemical samples of water provided to their customers and report the results of those samples to the TCEQ on a regular basis.

The City failed to monitor and/or report the following constituent and Monitoring Periods:

<u>Constituent</u>	<u>Monitoring Period</u>
<u>RAD</u>	<u>4th Quarter 2017</u>

Results of regular monitoring are an indicator of whether or not your drinking water is safe from chemical contamination. The City did not complete all monitoring and/or reporting for chemical constituents, and therefore TCEQ cannot be sure of the safety of your drinking water during that time.

The City is taking the following actions to address this issue:

The water well that produced the RAD violation was taken out of service in November 2017.

However, since the well was in production in the 4th qtr. of 2017 testing was still required. The City failed to properly monitor and /or report the RAD constituent for the 4th quarter of 2017. This notification is to correct that deficiency that occurred in 4th quarter of 2017.

The chemical RAD violations were reviewed by TCEQ and deemed to be no longer subject to the rules for 4th Quarter 2017.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions regarding this matter, you may contact:
